

DEVELOPMENT OF MAGNETIC SHEAR  
OCTOBER 11-13, 1981

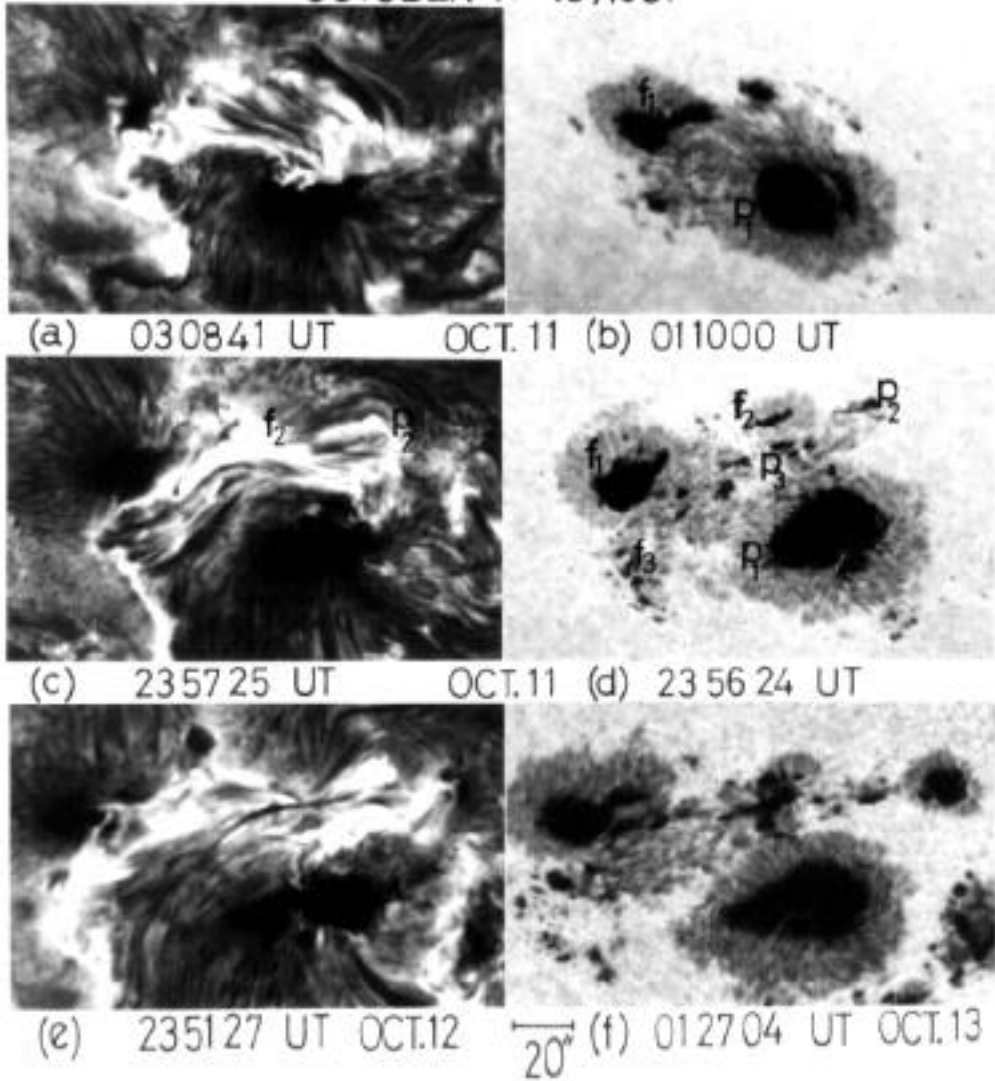

FIG. 4. 2.—Development of the magnetic shear during October 11–13, 1981 (from Kurokawa 1989). Left panels are observed in  $H\alpha$  and right panels are in  $H - 5.0 \text{ \AA}$ . Remarkable change of the direction of the emerging arch filaments can be seen. Courtesy of H. Kurokawa.
