

Ph567 Project Rubric

Charles Kankelborg

Version 2.1, 2022-Apr-19

Criteria

1. Present and motivate the problem.
 - The type of problem (ODE, optimization, etc.) is evident.
 - Knowns, unknowns, and relationships between them are given.
 - What is the objective?
2. Explain what you did.
 - Describe numerical implementation.
 - Address any issues raised with proposal and/or rough draft.
 - Show significant progress in attaining objectives.
3. Present results.
 - Show evidence of working code (e.g., appropriate plots).
 - Clearly interpret the results.
 - State conclusions.

Scoring (0-10 points $\times 5$)

Category	Score			
Problem	0	1	2	3
Implementation	0	1	2	3
Results	0	1	2	3
On Time	0	1		

Example score: P2 I3 R2 T1 = 40/50.
